

# tax transcript authentication

## veri-fy™

Veri-Fy™ authenticates that every IRS tax transcript has been delivered directly from the IRS database. Underwriters, lenders, and financial institutions can now perform their own due diligence by instantly re-verifying submitted income data on Veri-Tax's secure online platform, thus helping prevent fraud and manage risk throughout the lending process.

The order number and authentication code placed on the transcript summary page grants access to original borrower income tax transcripts processed by Veri-Tax, without the time and cost of processing a new 4506-T. Loans can be securely bought and sold with accurate and verified income data, though every step of the loan process.

## Instant Authentication

- Delivers authentic IRS tax transcripts previously processed by Veri-Tax
- Reduces risk related to authenticity of income data
- Unique authentication code secures all transcript requests
- Easy to interpret results
